

Universities, Colleges and Schools

Whether you're a large university, small school, or private institution, CAPACCIO can deliver all of your engineering and environmental, health and safety (EH&S) needs. Since 1992, our experts have been working to deliver a variety of services designed especially for the education sector including EH&S program development, auditing, compliance, and on-site assistance; preparation and submittal of environmental permits and registrations; wastewater (WWT) treatment design, compliance, permitting and training; above (AST) and underground (UST) storage tank inspections; air source registrations and greenhouse gas services; spill, control, prevention, and countermeasures (SPCC) plans; stormwater management plans (SWMP); water pollution control systems; and hazardous waste management.

Environmental, Health and Safety On-Site Services

CAPACCIO's EH&S professionals become part of your team under our unique Environmental Management Program™. With this service, our professionals can complement your existing staff or be used when needed to alleviate temporary or long-term workloads, or any ongoing challenges or constraints. Environmental, health, safety, sustainability, and code compliance services can also be out-sourced therefore providing your facility with the extensive expertise of our entire, multi-disciplined consulting firm while minimizing staff head count, cross-training, and overwhelming workload assignments.

Our on-site services are a great way to get expertise when you need it without having to hire and pay a full time salary and benefits.

Environmental, Health and Safety Compliance

- Compliance monitoring reports
- Contingency and emergency response plans
- Development of environmental management tools (e.g., environmental compliance calendar)
- EH&S auditing and compliance
- EH&S management programs and training
- EH&S live and computer-based training
- Emissions reports

- Hazardous waste generator training
- Health and safety compliance reviews
- Industrial hygiene sampling
- Industrial ventilation design and review
- ISO 14000 and OHSAS 18000 systems program development, implementation and integration
- Recycling program development
- Rideshare services
- SPCC plans and training
- SWMP development and revisions
- Support for auditing programs
- Waste management
- WWT system operation, maintenance assistance and operator training

Sustainability Services

- Sustainability and corporate assessments
- Water reuse

Environmental Permitting

- Determinations for Lowest Achievable Emission Rate (LAER), Best Available Control Technology (BACT), and Reasonably Available Control Technology (RACT)
- Engineering certification of ASTs and USTs
- Flammable storage permits and licenses
- Permit application preparation for air pollution control systems, process ventilation, stormwater and wastewater
- Permit application preparation for water treatment, sewer, and wastewater treatment systems
- Permit applications for fuel burning equipment including emergency generators
- Permit applications for Tier II
- Permit application preparation for surface water discharges under the National Pollutant Discharge Elimination System (NPDES) program

Engineering Design and Construction Assistance

- Air Source Registrations
- Bid assistance
- Contaminated soil and groundwater management
- Design of air and wastewater pollution control/treatment systems
- Design of local exhaust ventilation
- Drawings and specifications
- Greenhouse Gas Services
- Mercury removal
- Pilot testing
- Treatability and feasibility studies

Due Diligence

- Facility set-up and closure assistance
- Property transaction screening
- ASTM Phase I environmental assessments
- Groundwater investigations

QUALIFICATIONS

CAPACCIO professionals are:

- Certified DOT Hazardous materials Transportation Certified Hazardous Materials Managers (CHMM)
- Certified Environmental, Health and Safety Trainers (CET)
- Certified Safety Professionals
- Certified Industrial Hygienists (CIH)
- Licensed Professional Engineers (PE)
- Licensed Site Professionals (LSP)
- RCRA Hazardous Waste Management

SELECT CLIENTS

- Boston College
- Harvard University
- Landmark School
- Massachusetts Institute of Technology
- Tufts University
- Worcester State University

"I have been working with CAPACCIO since the firm's beginnings 24 years ago. Since coming to Worcester State, there have been numerous situations where CAPACCIO has had the precise fit of qualifications and talent. I have used CAPACCIO for a variety of projects like stormwater, LSP services and air quality, and have always been very comfortable and happy with the results. Any project I have thrown their way has been thorough, completed on time, and at a cost effective price."

Robert Daniels, Jr., Worcester State University
