

Environmental, Health and Safety Training Programs

Whether its general training to help your company with its regulatory requirements, or management level training to facilitate your operational or strategic planning, CAPACCIO has the environmental, health and safety (EH&S) training programs to meet all your needs.

Beginning with a training needs analysis, CAPACCIO evaluates your organization's specific EH&S training requirements and then works with you to identify the method of training (live classroom, web-cast or computer-based) that best suits your needs.

Live Classroom Training is conducted either on or off-site by our trained staff who deliver technical information in an interesting format to help maintain interest and focus.

Web-Cast Training uses web-conferencing to deliver any of our EH&S training courses via the Internet so that all divisions of your organization can participate in the same session or view recorded sessions at an alternative date and time regardless of their location.

Interactive Computer-Based Environmental Training™ (CBET) or eLearning is another medium in which training is packaged and delivered via the Internet, CD-ROM, or deployed through an existing Learning Management System (LMS). Unlike other eLearning solutions, ours is highly interactive with targeted feedback to ensure important concepts are understood and retained. Pertinent graphics, videos and sounds are used to demonstrate concepts and to enhance the learning experience. Both custom and standardized courses are available.

BENEFITS

- Improved EH&S compliance
- Reduced risk for fines and penalties
- Safer workers
- Reduced workmen's comp claims
- Well-aligned implementation of EH&S programs

SERVICES - if there is an EH&S training program that is not listed here, please let us know. We have the capability to do most programs.

- Biological safety/bloodborne pathogens
- Chemical hygiene/laboratory safety
- Confined space
- Crane and Hoist Safety
- Electrical safety
- Emergency preparedness and/or hazardous waste/materials/integrated contingency plan

- Environmental management systems (EMS)
- Ergonomics
- Fall Protection
- Fire Extinguishers
- Flammable and Combustible Liquids
- Forklifts
- Hazard communication/GHS
- Hazardous materials security
- Hazardous waste management
- ISO14001 and OHSAS 18001 implementation and awareness
- Lockout/tagout
- Machine Guarding
- Noise and Hearing Protection
- Occupational health and safety management systems (HSMS)
- Personal protective equipment
- Respirators
- Spill prevention, controls and countermeasures (SPCC)
- Stormwater pollution prevention
- Walking/Working Surfaces
- Wastewater Treatment System Operator training contact hour (TCH) continuing education credit courses
- Wastewater Treatment Operator exam preparatory self-paced course

QUALIFICATIONS

Our experienced professionals are versed in a variety of EH&S disciplines.

- Certified EH&S Trainers
- Certified Hazardous Materials Managers (CHMM)
- Certified Industrial Hygienists (CIH)
- Certified Exemplar Global Provisional ISO 14001 Auditors
- Certified Toxics Use Reduction Planners (TURP)
- Registered Professional Engineers (PE)
- Chemical, Civil, and Mechanical Engineers
- Licensed Site Professionals (LSP)
- Licensed Wastewater Treatment Operators
